## STEAMER ON ROCKY REEF

All Passengers Saved by Prompt Reply to Wireless Signals

Hullfax, N. S., Jan. 12.—The steamer Uranium, which terminated her voyage from Rotterdam by piling up on a rocky reef ten miles below Halifax in a fog yesterday, remained fast today, with Captain Eustace and crew aboard, but with all the 880 passengers safe ashore at the immigration station here. Whether the vessel could be saved was problematical.

The steamer is stuck bows-on, with 11 fathoms of water under her stern. The bowplates are ripped and No. 1 hold is water filled. The vessel's position is only a few hundred yards from the lighthouse at Chebucto head, where the keeper declares he was blowing his fog horn when the vessel struck. It was on the same ledge and not far from this spot that the steamer Atlantic of the White Star line was lost in April of 1873, at the sacrifice of 600 lives.

**Rescue of Passengers.**  
The rescue of the Uranium's passengers was accomplished by lifeboats from the Chebucto head and by transfer to the government steamer Lady Laurier, which was prompt to reply to wireless signals. There was no panic. All the passengers were landed here during the night. Six hundred of them, bound for New York, probably will leave today by special train. The Uranium is 22 years old and has sailed about all of the seven seas under four different owners and un-

der as many different names. She was christened the Avoca, later named the San Fernando and then the Atlanta. The Uranium Steamship company, her present owner, gave her the company's name. Her only serious accident of record is a collision with the steamship Nordenfels off Rotterdam four years ago, when she was badly damaged and one of her crew was killed.

**Did Not Hear Fog Alarm.**  
There is no explanation of the present stranding of the ship. She was considerably out of her course, Captain Eustace says he did not hear the fog alarm, although where he struck is not a quarter of a mile distant from it.

**MAY SAVE STEAMER.**  
New York, Jan. 13.—According to advices received at the Uranium Steamship company's offices this morning, all of the holds of the stranded vessel are dry with the exception of No. 1, which has seven feet

## INDICTMENTS ARE SAID TO BE VOID

New York, Jan. 12.—Counsel for Charles S. Mellen, president of the New Haven railroad, filed a plea of abatement in the United States district court today, asserting that the recent indictments against Mellen, President E. J. Chamberlin, of the Grand Trunk railway, and Alfred Smithers, chairman of the Grand Trunk, were void, because one of the grand jurors, Alfred A. Stephens, was a resident of New Jersey. Messrs. Mellen, Chamberlin and Smithers were indicted on charges of violation of the criminal clause of the Sherman anti-trust law for participation in an alleged monopoly agreement between the two railroads.
